SERVING SOUTH SOUND SINCE 1925!

Photo courtesy: Doug Walker | Walker Photography

Hello everyone! This will be the last newsletter until fall. I only have a few things this month.

First of all, we had a successful Home Show! We saw lots of our existing customers and gained/will gain plenty of new ones. Thanks to all who stopped by to say hello.

Summer is our time here at Acme to slow down a bit, take our vacations, etc. This summer is very welcome!

After the February Snowmageddon and persistent cold weather, we are ready for a break! Due to this cold weather, everyone used more propane and heating oil than “normal”. We have had lots of calls from people shocked at how low their tanks are; don’t worry, this is

normal. Fuel usage for heating is not constant at all. It fluctuates (sometimes greatly) from year to year based on the weather. Also, if you have a heat pump with propane back up furnace, you definitely used more. Most heat pumps switch to their back up mode when the temperature drops below 30-40 degrees.

If you are on automatic refill, and you either add or remove a propane appliance, please let us know so we can adjust your delivery accordingly.

Fast Fuel customers....if you want to “go green” and save money, sign up for email statements and ACH payment from your bank. It saves time, paper, postage, and we will give you a 5 cent per gallon discount

on your fuel purchases. Call the office for details.

Propane/heating oil customers...you too can sign up for email statements. And you too will then always receive your 5 cent per gallon prompt pay discount!

Finally, remember we have ethanol free gas for your yard equipment, boats, etc. We are open 24/7 with either our Fast Fuel card (best pricing) or with a Visa or Master Card. That’s it till fall!

Have a great Summer!

Christophe Allen
